

KNOWLEDGE PROGRESSION YEAR GROUP OVERVIEW – Computing

Features
<ul style="list-style-type: none">• At Early Years, the key knowledge progression document takes reference from the following documentation: Early Years Framework, Development Matters and Birth to 5 Matters
<ul style="list-style-type: none">• At key stage 1, the key knowledge progression document takes full account of the national curriculum’s requirements and groups these into the following strands:<ul style="list-style-type: none">○ Algorithms○ Creating Programs○ Reasoning○ Using Technology○ Uses of IT beyond school○ Safe Use• The strands have been selected to reflect the key knowledge and skills in the national curriculum subject content.
<ul style="list-style-type: none">• At key stage 2, the key knowledge progression document takes full account of the national curriculum’s requirements and groups these into the following strands:<ul style="list-style-type: none">○ Algorithms○ Creating Programs○ Developing Programs○ Reasoning○ Networks○ Search Engines○ Using Programs○ Safe Use• The strands have been selected to reflect the key knowledge and skills in the national curriculum subject content.
<ul style="list-style-type: none">• Skills are dependent on specific knowledge. A skill is the capacity to perform and in order to perform a deep body of knowledge needs to be acquired and retained.
<ul style="list-style-type: none">• These knowledge statements should be what pupils retain for ever. In other words, this knowledge is within their long-term memory and will be retained.
<ul style="list-style-type: none">• When considering pupils’ improvement in subject specific vocabulary, pupils could be provided with a knowledge organiser which contains the relevant words used for computing for their age group.

KNOWLEDGE PROGRESSION YEAR GROUP OVERVIEW – Computing

National Curriculum Subject Content								
Educational Programme								
Early Years	<p><i>Understanding the world involves guiding children to make sense of their physical world and their community. The frequency and range of children’s personal experiences increases their knowledge and sense of the world around them – from visiting parks, libraries and museums to meeting important members of society such as police officers, nurses and firefighters. In addition, listening to a broad selection of stories, non-fiction, rhymes and poems will foster their understanding of our culturally, socially, technologically and ecologically diverse world. As well as building important knowledge, this extends their familiarity with words that support understanding across domains. Enriching and widening children’s vocabulary will support later reading comprehension.</i></p>							
Strand	Algorithms	Reasoning	Creating Programs	Using Technology	Uses of IT Beyond School	Safe Use		
Key Stage 1	<ul style="list-style-type: none"> Pupils should be taught to understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions 	<ul style="list-style-type: none"> Pupils should be taught to use logical reasoning to predict the behaviour of simple programs 	<ul style="list-style-type: none"> Pupils should be taught to create and debug simple programs 	<ul style="list-style-type: none"> Pupils should be taught to use technology purposefully to create, organise, store, manipulate and retrieve digital content 	<ul style="list-style-type: none"> Pupils should be taught to recognise common uses of information technology beyond school 	<ul style="list-style-type: none"> Pupils should be taught to use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies 		
Strand	Reasoning	Algorithms	Creating Programs	Developing	Using Programs	Networks	Search Engines	Safe Use
Key Stage 2	<ul style="list-style-type: none"> Pupils should be taught to use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs 	<ul style="list-style-type: none"> Pupils should be taught to use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs 	<ul style="list-style-type: none"> Pupils should be taught to design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts 	<ul style="list-style-type: none"> Pupils should be taught to use sequence, selection, and repetition in programs; work with variables and various forms of input and output 	<ul style="list-style-type: none"> Pupils should be taught to select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information 	<ul style="list-style-type: none"> Pupils should be taught to understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration 	<ul style="list-style-type: none"> Pupils should be taught to use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content 	<ul style="list-style-type: none"> Pupils should be taught to use technology safely, respectfully and responsibly; recognise acceptable / unacceptable behaviour; identify a range of ways to report concerns about content and contact
